SUBJECT: **RfS 21#074 COE support to the production of ATP 3.2.1.5 "Conduct of Land Operations in Cold Weather Environments"**

RfS 21#076 COE support to Cold Weather Operations (CWO) concept development

No: 10.i

PURPOSE: To approve the participation of IAMD COE in the above supporting actions regarding RfS 21#074 and 21#076 and to update the RfS status feedback as : ACCEPTED.

BACKGROUND: 1. Both RfS are COE to COE projects. COE CWO is the project leader.

2. Final Concept estimated at December 2023.

3. RfS 21#074 concerns the doctrinal activity of supporting the production of ATP 3.2.1.5 – Conduct of Land Operations in Cold Weather Environments. The COE CWO has identified a doctrinal gap in NATO for CWO due to lack of validated best practice for CWO as well as the absence of detailed description of operational requirements, standards, training and equipment procurement.

4. RfS 21#076 concerns the participation in effort of CWO COE for developing the Joint Concept for Operations in Cold Weather Environments. This concept will support NATO capability development and interoperability and will be based on a common framework that encapsulates

common procedures and standards regarding the preparation and conduct of joint operations in a cold weather environment.

5. An initial workshop will be conducted via vtc in Sep 2021.

ANALYSIS &
STATUS:

1. Pillars: DD&S and CD&E
2. Operations in cold weather environment are joint and multi-national in its character.
3. The concept will address cold weather and environmental implications across DOTMLPFI spectrum for NATO.
4. The IAMD COE considers the participation in the two RfS beneficial for the Centre since it provides added value to NATO regarding
 - Doctrine and Concept development
 - Joint/Combined Operations.
5. Current status for both RfS : TBA

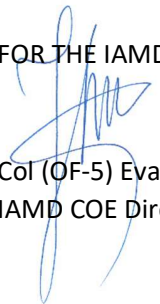

FINANCIAL
